Lightroom Classic Workshop by Dave Kelly

SANP is proud to present the complete course of Lightroom Classic by Dave Kelly. Dave is an award-winning wildlife photographer who has been an Adobe Certified Instructor for Lightroom® since the first version. He has been an Adobe Certified Instructor for Photoshop starting with CS4 and has maintained that certification making him one of the very few Adobe Certified Instructors in the United States for both of Adobe's software programs for photographers. Dave is one of only eight certified Adobe Lightroom instructors in the United States. Dave also holds the Certified Technical Trainer credential from the CompTIA organization, is a member of Nikon Professional Services, and instructs/teaches Lightroom® and Advanced Lightroom® curriculum for Shoot the Light Workshops and Technical Series. He is also the author of Lightroom® Made Easy books all of which are true "how to" books. The 13th edition was just released in October of 2023. The book not only tells you what can be accomplished with images in Lightroom®, but also tells you how to accomplish it with easy-to-understand, step-by-step instructions.

Why Should You Attend Dave's Workshop:

You will learn from an Adobe-certified instructor. Why is this important? Many of those who teach Lightroom are teaching based on what they have discovered works for them without knowing all the ins and outs of Lightroom. Not only is Dave a certified Lightroom instructor, but he is also an award-winning wildlife photographer. He understands what is important to wildlife and nature photographers.

Dave only teaches in-person workshops as it is important for him to get feedback from his audience and allow you to ask questions. Dave will cover the new content aware erase function in the healing tool, the new Lens Blur panel and the new Color Mixer panel, as well as the new techniques in the Masking panel. For more information about Dave you can visit his website at [this link](#).
